And the seven angels which had the seven trumpets prepared themselves to sound. Rev. 8:6

The Trumps

In the Book of Joshua Chapter 6, the walls of Jericho are brought down with seven trumps, sound vibration on seven levels. The sonic energy of the trumps awakens the seven seals (chakras) of the body.

After repentance, cleansing, and immersion in the Holy Spirit, the Christ instructs us in the baptism of fire and the awakening of our subtle bodies of Light. He makes us riders on the heavenly waves (Ps. 68:4).

The book of Joshua teaches soul transition from the law of the outer self to the inner consciousness of Light.

The First Four Trumps

The solar year (based on the equinoxes and solstices) is the “Enoch circle” because the 365 years Enoch lived is the number of days in an equinocial year. The name Enoch appears (in Heb.) on the Template below, on the right side, in relation to the first trump (Rev. 8:7).

The fourth trump (on the left side of the Template below) has the name “Jacob,” and having twelve sons, he is associated with the twelve thresholds of the Zodiacal wheel, the stars (Gen. 37:9).

The “sea” is mentioned with the second trump in Rev. 8:8. The sea is “the sea of time” including the “Precession of the Equinoxes.” Jacob guides us beyond the wheel, he causes the scepter to rise (Nu. 24:17).
In Rev. 8:13, the eagle is flying in the mid-heaven (the eighth chakra over the head). Symbolically related to the eagle is the Heb. word for “zeal,” shown in the upper right of the Template (the green letters connected with the fourth trump).

The second trump (center-right) contains the Heb. word for “Immaculate.” The trumps are associated with thresholds in Taurus-Orion, they also include mysteries of the “moon.” The Shekinah, or divine feminine principal in the Tree of Life, is known as “the moon.” The feminine principle was anciently associated with the star Sirius.

Sirius, named the “scorcher” in Greek, has a 1460 year cycle. Sothic years of 365 days each were used during dynastic Egypt for a calendrical system based on the day of its annual rising with the sun (the heliacal rise).

In the work of the Academy of On, the heliacal rise of Sirius is called the Benjamin Gate, currently taking place Aug. 9th as the sun begins to enter the constellation of Leo (Sirius is the “wolf” or “dog star,” see Gen. 49:27).
In the picture at left (an excerpt from the *Messianic Word Template*), the Hebrew word “Benjamin” is seen over a trumpet.

The first three trumps come together in the mystery of the fourth trump where sun, moon, and stars are all mentioned together (Rev. 8:12). The third trump is symbolized in the Trumps Template above by the blue letters making a vertical line down the center and terminating at the diamonds.

The diamond forms a “pendulum” marking time. The Heb. phrase written (in blue) is *Holy of Holies*.

The light blue color indicates this is the Lamb's throne, and in terms of our local universe, it is related to the star field of Alcyone in the Pleiades cluster, 33 degrees from the start of the Zodiacal wheel.

The Scepter Shall not Depart from Judah

Judah is a lion (Gen. 49:9-10) and the scepter (and authority) remains with the House of David. The Christ is the Lion of Judah, root of David (Rev. 5:5). He is the authority to open gates to the higher Light.

The population numbers of the “tribe of Judah,” reveal the angular distance of 45 days when calculated into the Enoch year (Dr. J.J. Hurtak, *Keys*, Key 206).

45 days currently separate the autumnal equinox (as a point in the “body of the solar lion”) and the heliacal rise of the wolf star Sirius (as the sun enters the constellation of Leo).

The autumnal equinox is moving toward the constellation of the lion. Jer. 5:6, *Wherefore a lion out of the forest shall slay them, and a wolf of the Araboth (the plain, or plane as orbital field) shall spoil them...*

Benjamin, as the wolf star (Sirius), establishes a time coordinate within the threshing of the cycles of time (as with a flail). This is the helical rise of Sirius 45.15 days before the autumnal equinox.

Benjamin is linked to his brother Joseph, the shepherd, symbolized as the Sphinx Vehicle of Light opening the dimensions that we may be shepherded beyond our solar spectrum. *Thy rod and thy staff, they comfort me.* Amen.

Stars of Administration

Light pulses from the constellation of Orion modulate changes to our world (Job 38:31). Light pulses are used to support consciousness growth and soul development. The descending fire of the Sirius threshold (the brightest star in the night sky) impacts the energy grids of our planet.

In the graphic below, the star Sirius corresponds to the consciousness movement from the Lamb’s throne in Alcyone to the threshold of Mintaka (in the Belt of Orion). The star Betelgeuse (alpha Orion) is shown conducting the movement from Alnitak (divine measure) to the door to the Father in omega Orion.

At the point where the two triangles overlap to form a diamond shape in the center (of the graphic below) is the Aramaic phrase for the *Book of Concealment*. This mystery corresponds to the overlap between Father and Son universes as it relates to the Alnilam threshold (the center star in the belt of Orion).

The first trump heralds the increased energies of the overlap: *cast upon the earth*. The trumps bring energies of the higher thresholds of administration affecting the grids of our subtle bodies, the grids of our planet, and the grids of our galaxy. In the Academy of On, the seven trumps correspond to the seven vertical pathways of the Tree of Life marked with the seven “double letters” of the Hebrew alphabet.
As long as there was no scale, there was no providence face to face (Siphra Detzniutha).

The Traveling Star

An equinoctial year (based on the seasons) is 365.242 days long. In ancient Egypt (and in the Mayan “Haab”) there existed a 365 day calendar (without the .242 fraction of a day). In Egypt, the start for this type of ancient calendar was when the star Sirius was seen rising with the sun on the horizon at dawn.

365 days later, the next New Year’s Day was celebrated. By the fourth year, because this did not account for the extra quarter of a day that makes a full year, the New Year’s Day would come one day earlier. Thus it took 1461 years for the New Year’s day to return to the day when Sirius rose with the sun (the “heliacal rise”).

Sirius is the “traveling star” because after the heliacal rise is set by the first “New Year’s Day” of a cycle, all of the following New Year’s Days in the “Sothic” calendar drift through the year. New Year’s Day is “traveling” through the year to land on a different day every four years. Currently the Sothic New Year’s Day was on Easter, 4-20, 2014.

Because the Sothic year is almost a quarter of a day shorter than a standard year based on the seasons, another type of cycle emerges: in 25 of these years (of 365 days even) there are almost exactly 309 lunations (of 29.53059 days). Two of these cycles, or 50 years, contain 618 lunations. 618 is the reciprocal of the golden ratio. 618 is the code of the Revelation Time Table associated with the center ring in the Mandala (Ch. 3, The Book of Levels).

Thus through the lunation cycle, Sirius is associated with the feminine power of rebirth and cycles of growth.

Ps. 89:37, It shall be established for ever as the moon, and as a faithful witness in heaven. Selah.

The Heb. word for established is shown in the circle under the red scarab at right. A scarab represents transformation and “coming into being” (i.e. on the next plane of existence).
The red scarab is symbolic of a “separated one,” established in the wisdom and ordinances of YHWH. The Heb. name on the wings is Ruach Elohim, “Spirit of God.”

The Earth Grid

Sacred geometry organizes and amplifies consciousness, the golden ratio (phi ratio) allows it to nest and expand symmetrically.

One level of the earth grid is based on an icosidodecahedron with thirty vertices (shown at left). An important dynamic of this geometry is that the circumradius divided by its edge length equals the golden ratio, 1.618033. Thus this component of the earth grid is based on the inherent ability to nest information according to the golden mean (and the related Fibonacci series).¹

Within an icosidodecahedron are six decagons, six slices each with ten sides. The gray shaded area in the center of the dissected geometry at left depicts one of the six decagons within the icosidodecahedron.²

The vertices of the icosidodecahedral grid are pictured on the map below. An example of the ten points of one of the six decagons is shown, each of the blue circles marks a vertex point of a decagon slicing through the earth.

¹ The icosidodecahedron of the earth grid geometry has edge lengths, that when divided by the circumradius, equal .618. The lunation cycles within the ancient Sothic calendar (marking years of exactly 365 days) correspond to the reciprocal of the golden ratio (618 lunations in 50 Sothic years).

² 3001, the value of the outer ring of the Royal Mount Zion Seal is one in a series of numbers that form a figurate centered decagon (300 dots in each of the ten sections around a center dot). The shaded area in the center of the geometry above could therefore be perfectly formed with 3001 dots. 3001 is a factor in every 25th number of the Fibonacci series.
The radius of the earth is 3960+ miles and when multiplied by .618033, (reciprocal of the golden ratio), the distance between the points of the grid map above is 2448 miles (not with the curvature of the earth, but as the straight line of the geometry).

2448 = 1Chr. 28:19, All this, said David, YHWH made me understand in writing by his hand upon me, even all the works of this pattern.\(^3\)

What is one purpose of the geometric pattern? 2448 also equals Ps. 19:4 referring to the Heavens: Their measuring-line is gone out through all the earth, and their words to the end of the world. In them he has set a tabernacle for the sun.

The beginning of the next verse then relates this “tabernacle for the sun” to the Chamber of the Son:

Ps. 19:5, Which is as a bridegroom coming out of his chamber...

**Judgment: the Final Mem**

The five final letter forms of the Hebrew alphabet are associated with judgment. The final mem, shown in red, is found in the middle of the word for “increase,” in the phrase “the increase of His rule” Is. 9:7.

The Adversary brings forth the illusion of Christed beings who perform signs but who are without the establishment of the inner temple and without a three-fold presence as their foundation. The true Capstone teaching has the anointing power of the Holy Spirit and the wisdom of the Word.

The false will be multiplied at this time of the cleansing of the heavens for they are being cast out of higher vibrations and seeking dominion here. They seek self-aggrandizement and display superficial talents that fool many. There will be instances of this deception on a mass scale.

Some seekers have prompted “glory moments” but lack wisdom in their holiness—such attempts at “self-mastery” are not the same as self-realized which is fully contemplated.

The fire from the higher thresholds is the same fire in our embryonic energy system. When these fires are increased in the energy grid of the earth, by decree from the celestial threshold, the increase impacts souls through resonance.

Fire is thus released internally, and for a bio-system that is unprepared, vipers loving chaos come out of the flute holes (of the chakra system).

Woe to the caretakers who have neglected the stewardship of their domains, they have not the structure of a nurturing spirit. The fallen “authority” lures those with the Christed potential and they who succumb become the whoredom, seduced by a false image.

Image is the true expression of the Covenant with YHWH. 
Let nothing keep you from before Me.

---

\(^3\) The Heb. for “the pattern” ha-tabniyth is value 867, the coding of the inner ring of the Royal Mount Zion Seal. The frequency of the light pulse from Alpha Orion is .867 per Sothic year of 365 days. The light pulse is described in the *Omega Charter.*
Through the supreme mystery of forgiveness, Yeshua made the atoning sacrifice for all, that we may seek eternal life though Him. Yeshua fulfilled the Mystery on all levels that we know by what Name and which gates we enter the World to Come: I will call them from their stations.

Betelgeuse

Betelgeuse (a Ori) is defined as one threshold providing “energy codes” entering our spectrum to raise our consciousness (Hurtak, Keys, Key 201:15). This is provision for the crossing of the river of time.

The Heb. word for “provision” in Scripture, Heb. tseydah, is related to the word for “hunter,” i.e. “Orion.”

Jer. 16:16, Behold, I will send for many fishers says YHWH, and they shall fish them; and after will I send for many hunters (Heb. tsayadim), and they shall hunt them from every mountain, and from every hill, and out of the holes of the rocks.

The following prayer was recorded at Homolovi, Az:

O Yo-Heh-Wah, may we enter in among our ancestors, among the Elders, to the House of El in Betelgeuse. We pray for our brothers and sisters, all those who have walked this land before and all those who will come after.

We give thanks for the teachings opening the star field of Betelgeuse and the teachings in the sacred Templates that reveal your deeper mysteries…that those who are walking the path may know the guideposts, may recognize the signs, and may reflect upon your glory and bear witness that your Word is True.

May the guardians of this gate of Paradise receive us and open these fields of Light for the time of great change and for the people walking in the Procession honoring the labyrinth, the teachers, and the Lords of Light who have paved the way to the Tree of Life.

May the star portals established by the kivas be opened that time-translation be accelerated in preparation for the landing of the Merkabah vehicles of Light according to the array of interstellar connections within the sacred architecture of the Great House.

We praise you Heavenly Father for you have brought us into the inner court, in the Holy of Holies, in the inner mind of the Dove which connects the sacred ceremonies of the people of God, the Ammi Shaddai in all regions according to a vast network of hyperspace—pillar to post.

Bless the Name, Amen, Amen, Amen, and Amen.
The Resonator

At the center of the Resonator Template, two Heb. *mem* letters represent sound vectors used in the transcription of the fire letters. The two *mem*’s and the center area of the Template symbolically correspond to the “throat of the Lion” issuing the divine voice.

The Resonator Template harmonically corresponds to the “City of Sound,” the Mayan archaeological site of Tikal, Guatemala. The Template resonates to cycles of time as set in higher thresholds including the Pleiades.
The large copper and silver spheres are modulating wave factors of Sirius and Arcturus. Around these spheres are microtubules, information receivers within our cells (Hurtak, Keys, Key 315, and Key 313:48). The microtubules receive the melody of the *Yod Record* (spectrum units) to increase our biological quantum computing capability.

The Resonator Template shows the first of three verses in the Book of Exodus containing the 216 letters for the 72 names of God (Ex. 14:19-21). The 72 name grid was used by Moses to “part the Red Sea” or open up our solar spectrum to the higher Light.4

The splitting of the Red Sea (boundary of our solar spectrum) is detailed in Ex. 14. Ex. 14:9 speaks of the failure of the “physical level” chariots (symbolized as the “chariots of the Egyptians”), they were not able to access superluminal Light waves in Merkabah.

The bronze color in the three large spheres represents the Arcturus shepherding function. The shepherding function of the priesthood, represented as “Joseph,” administers the descending fire of the Sirius threshold, i.e. “Benjamin” (Joseph’s brother).

The silver color (traditionally related to *Hesed* in the Tree of Life) incorporates Mercy within the “power brought to the birth” (of the subtle energy bodies).

On the day the sun aligned with the heart of the lion in the constellation Leo, an earthquake cracked the Washington Monument. This was Day 399 of the first timeline, 8-23, 2011.

Few Templates were signed with the day code but the Resonator Template above was dated, on the day it was completed, with the day code “399.”

Not known at the time this Template was received from the divine Providence, it would be 993 days later that the Washington Monument was reopened, on 5-12, 2014. The number 512 is shown with the orange “frequency” line (p. 9). 512 is a code of the Revelation Time Table (*Book of Levels*, Ch. 11).

993 (the reverse of day code 399) is the “keystone” number 331 multiplied by three. 331 is also a code of the Revelation Time Table (detailed on p. 4 of the *Metatron* pdf. 331 is intrinsic to the Royal Mount Zion Seal as well as Pyramid measure).

The Resonator has nine segments in the outer ring corresponding to nine divine principles and the Council governing our region of space.

To wear the face of the lion is to know your identity in God, to know the higher thresholds in Orion, Sirius, Arcturus, and the Pleiades. Amen and Amen.

---

4 The other two verses are found on the Counting Scepter Template (p. 7, *A Capstone Teaching*) and the Throne Chariot Template (in the *Tabernacle of the Testimony*).
